

SHAIK MOHAMMED SAMEER

Computer Science Engineer | Graduate

+91 9347773294 | shaikms133@gmail.com | Chennai, India | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Computer Science engineering student with hands-on experience developing backend systems, REST APIs, and scalable microservices using Node.js, NestJS, TypeScript, and Redis. Experienced in building production-oriented backend modules through internship experience and independent projects, with additional experience in Python-based LLM evaluation pipelines. Strong foundation in algorithms and Agile development practices.

TECHNICAL SKILLS

Programming Languages: C, Python, SQL

Frameworks & Technologies: NestJS, React, Next.js, Rest APIs

Databases: PostgreSQL, Redis, MongoDB (Basic)

Tools: Docker, Git, GitHub, Jest, Postman

EXPERIENCE

Software Development Trainee

Mar 2026 - jun 2026

CodTech IT Solutions Pvt. Ltd.

- Developed responsive frontend interfaces using HTML, CSS, and JavaScript, integrating REST APIs to deliver dynamic and interactive application features.
- Integrated frontend components with NestJS REST APIs, consuming and rendering API data to build end-to-end application functionality.
- Optimized API response handling and data fetching to reduce unnecessary client-side requests and improve application efficiency.

PROJECTS

SRBench – Structured Mathematical Reasoning Benchmark for LLMs

Research

- Designed and generated 1,245 template-based mathematical reasoning problems across 8 difficulty categories for evaluating Large Language Models (LLMs).
- Engineered Python-based evaluation pipelines and prompt templates, enabling GPT to achieve 78% benchmark accuracy compared with 61% for DeepSeek.
- Published research on the SRBench mathematical reasoning benchmark.

Event Management System – Full-Stack Web Application

Link

- Built a full-stack event and student management system with role-based dashboards for students and administrators and dynamic data rendering.
- Implemented an admin panel with real-time search and filtering, certificate approval workflows, and status tracking for Accept/Reject/Delete operations.
- Designed a responsive student dashboard with sidebar navigation, dark mode, and progress-tracking widgets for courses, events, and activities.

EDUCATION

B.Tech in Computer Science, SRM Institute of Science and Technology

Present

GPA: 8.07 / 10

CERTIFICATIONS

Java (Basics) – HackerRank

Feb 2026

Go for Web Development – Infosys Springboard

Jun 2025

AWARDS

SRM Rise and Shine Award – SRM Institute of Science and Technology

Hackathon – Full Stack Tech Fest Award – SRM Institute of Science and Technology

PUBLICATIONS

SR-Bench Marking – ResearchGate, Oct
